

AURA Forge Rubric Self-Check

Canvas file 06 - grader-facing self-assessment. Final score remains evidence-grounded: 49 / 52.

Final video URL: <https://youtu.be/srFGYvnEd7c>. Score stays conservative without independent content re-review.

Criterion	Score	Defensible Evidence Summary
1. Problem + user value	4/4	Clear stakeholder-facing summary, one-pager, final deck, and evidence index.
2. Architecture / system design	3/4	Architecture evidence exists, but score was intentionally not inflated.
3. Agent workflow	4/4	AURA Forge route, intake, confidence signal, and demo script documented.
4. Data / evaluation rigor	3/4	Evaluation and holdout checksum exist; not upgraded beyond evidence.
5. Safety / governance	4/4	Governance, audit, and submission checks documented.
6. Implementation quality	4/4	Submission package points to committed implementation and deterministic demo evidence.
7. Testing / validation	4/4	CI and lightweight checks recorded without rerunning historical holdouts.
8. Product polish	4/4	Final Gamma PDF, scripts, and Canvas packet are present.
9. Deployment / operations	3/4	Operational evidence remains conservative and not overstated.
10. Documentation	4/4	README, quickstart, evidence index, and submission links are aligned.
11. Stakeholder communication	4/4	Final walkthrough artifact exists and is linked in current submission docs.
12. Demo readiness	4/4	Demo script, teleprompter, final deck, and final video URL are included.
13. Submission completeness	4/4	Canvas upload map and final checklist identify remaining human portal actions only.

Human-only step left: upload the Canvas packet and paste the final video/submission links into the LaunchCode portal.
